BHAVESH KORANE

Software Developer
+91 8806522692 bhaveshkorane008@gmail.com LinkedIn Portfolio Pune

Summary

Backend & AI Engineer with hands-on experience building **production-grade agentic systems**, **RAG pipelines**, and **scalable backend services**. Skilled in **Python, FastAPI, PostgreSQL, Marqo, Docker**, and **LLM integrations**. Designed and deployed **real-time AI workflows** including **MCP-based tool ecosystems**, **vector indexing services**, and **chat-based retrieval systems**. Strong focus on **rapid prototyping**, **system reliability**, and **user-centric tooling**. Passionate about advancing **AI engineering**, **evaluation**, and **intelligent agent infrastructure**

Skills

Languages: Python Java C C++ SQL HTML CSS JavaScript

Technologies: FastApi Django PostgreSQL Docker Redis Streamlit Marqo MySQL Quadrant Elasticsearch Jira

Concepts:
MCP Server Architecture Retrieval-Augmented Generation Large Language Models AI API Integration Prompt Engineering RESTful API Design Object-Oriented Programming Database Management Microservices Data Structures & Algorithms Containerization Cloud Deployment

Experience

Tekdi Technologies — Pune, India
Software Engineer (L1) — 06/2025 - Present

- ***Sakhi – AI Agentic Search & RAG Platform* -** Built an **end-to-end RAG system (Sakhi-Chat)** enabling natural language querying over documents and images.Created a **vector indexing pipeline using Marqo** for fast semantic retrieval at scale.Integrated **Sakhi APIs with LLMs** to create **agentic query workflows** that dynamically use **real-time APIs** to answer complex user questions.Designed and deployed a **production-ready interactive frontend + backend** using **Replit** and **Cursor**, reducing deployment time by **60%**.Built **evaluation and testing workflows** to ensure consistent, high-quality results from the **Sakhi AI agent**
- **MCP Servers – AI Tooling Infrastructure -** Set up and managed **multiple MCP servers** for internal tools like Redmine and PostgreSQL.Built custom tool integrations enabling **AI agents to interact with enterprise systems**.Connected MCP tooling with Cursor and LLM pipelines, enabling hybrid human-agent collaboration
- **AI & Agentic Tech -** LLM Integrations (OpenAI, custom API agents),RAG Pipelines (Marqo, embeddings, retrieval),Agentic Workflows (MCP servers, tool integrations).AI Evaluation & Testing (query consistency, response validation).Data Indexing & Search Infrastructure (Marqo, PGSync → Elasticsearch)
- Highlight your accomplishments, using numbers if possible.
- Created a workflow for users to create and update their resumes through the website using data from their profiles.
- Implemented dynamic configuration of elements from the backend.
- Developed backend features for users to download certificates.
- Enabled learning partners to create their own certificates and handled edge cases.
- Integrated pgSync as middleware to map data from PostgreSQL to Elasticsearch.
- Helped build the global search feature.
- Created front-end applications using Streamlit to simplify demo workflows.
- Technologies Used: Streamlit, Docker, Python, FastAPI, PostgreSQL, Jira, Redis.

Tekdi Technologies — Pune, India
Trainee Engineer — 06/2024 - 06/2025

Skill India Digital Hub (SIDH) - National Skill Development Corporation (NSDC)

- **Digital CV Module** – Created a workflow for users to create and update their resumes through the website using data from their profiles. Implemented dynamic configuration of elements from the backend.
- **Certificate Module** – Developed backend features for users to download certificates. Enabled learning partners to create their own certificates and handled edge cases.
- **PGSYNC** – Integrated pgSync as middleware to map data from PostgreSQL to Elasticsearch.
- **Global Search** – Helped build the global search feature.
- **Streamlit Demos** – Created front-end applications using Streamlit to simplify demo workflows.
- **Technologies Used** – Streamlit, Docker, Python, FastAPI, PostgreSQL, Jira, Redis,

Documents

Education

TKIET(Autonomous), WARANANAGAR KOLHAPUR

Bachelor's degree, Computer Science | CGPA: **8.8** / 10.0 01/2020 - 12/2024

- *B.Tech. Computer Science & Engineering with First Class with Distinction; AI Honors including ML, DL, NLP & DAR (TCS iON)*

Certificates

Salesforce Certified AI Associate certification

SQL Intermediate Certificate on CodeChef

Projects

ML-Based College Prediction System (Final Year Project)

*A machine learning system that predicts suitable colleges for students based on **JEE scores**, using historical admission data and cutoff trends to provide accurate, personalized recommendations.*

- Built ML models using **Scikit-learn** to predict college admissions based on opening/closing ranks, cutoff trends, and student preferences.
- Designed a **Streamlit-based frontend** with secure login and a user-friendly interface for real-time predictions.
- Processed and cleaned large datasets using **Pandas** and **NumPy** to improve model accuracy and reliability.
- Integrated the system with **PostgreSQL** for storing user data, historical cutoffs, and prediction logs.
- **Technologies: Python**, **Scikit-learn**, **Pandas**, **NumPy**, **Streamlit**, **PostgreSQL**

AI Interview Assistant (Hackathon Project)

An AI-powered interview automation system that assists interviewers by generating personalized questions, analyzing candidate responses in real time, and managing the full interview workflow through an interactive dashboard.

- Developed an **LLM-powered question generator** that creates role-specific technical and behavioral questions using the **candidate's resume** and **job description**.
- Implemented **real-time audio transcription** via **WebSockets**, enabling the LLM to provide **live answer analysis** and adaptive follow-up questions during the interview.
- Implemented **real-time audio transcription** via **WebSockets**, enabling the LLM to provide **live answer analysis** and adaptive follow-up questions during the interview.
- Created a modern, responsive **React UI** featuring a Dashboard, Question Generator, Schedule Interview interface, Interview Session screen, Reports view, and History logs.
- Designed reliable backend APIs using **Flask**, ensuring smooth integration between the UI, transcription pipeline, and LLM analysis engine.
- **Technologies:Flask**, **LLM APIs**, **WebSockets**, **React**, JavaScript, HTML/CSS

Key Achievements

Appreciation for SIDH Project

Received appreciation from the team and higher authorities on the client side for delivering high-quality work on the SIDH project.

Problem-Solving Achievement

Solved 200+ LeetCode problems, demonstrating strong analytical and problem-solving skills.

Achieved leadership milestones

President of college coding club (LOGICODE) and captain of Kabaddi team, demonstrating strong team management and ownership.
